

### **USB MIFARE desktop reader/writer**

ZeitControl has extended its line of RFID reader/writers by an USB device. There are MIFARE, HITAG 1+2, 4102/4150 and I-CODE reader/writers with either RS-232 or USB interfaces available.

The USB devices are powered from the PC or Hub. An external power supply is not required. By using a special USB driver no special USB knowledge is necessary to integrate these devices into applications. The USB interface is compliant to USB 1.1 and USB 2.0.

More information of ZeitControls TagTracer line is available at <http://www.transponder.de>.

You will find us at the CTST 2004, Washington D.C., April 26-29, Booth 106
