## Programmable Smart Card for less than 1 €

The BasicCard ZC3.12 is the first programmable smart card for a price less than 1 €. This microprocessor based smart card is programmable in BASIC. Applications like E-Purse, Identification Card, Medical Card, Gift and Loyalty Card and so on, can simply be developed in BASIC and are full compatible to the ISO 7816. Encryption technology like AES, DES or ECC is included.

A Development Kit is available for 59 €.

A full version of the PC development software can be downloaded for free @ [www.basiccard.com](http://www.basiccard.com).
